

Latest News – Naperville Central High School Project Awarded to IHC

IHC Construction is pleased to announce they have been selected by Naperville Community Unit School District 203 in Naperville, Illinois, as the Construction Manager for the additions and renovations to Naperville Central High School, as part of the District's multi-facility construction program. Wight & Company of Darien, Illinois is providing architectural design services.

The construction projects at Naperville Central High School encompass \$87.7 million of the \$114.9 million District-wide program.

The construction projects include 172,430 square feet of additions, including a three-story classroom addition, a three-story administration and entry addition, and a music addition.

The 280,000 square feet of renovations include gutting and remodeling throughout the interior, asbestos abatement, new security and communications systems, relocating the library, a new sprinkler system, and mechanical, electrical, and plumbing updates. Exterior renovations include reconfiguring the bus turnaround and underground storage detention.

Construction at Central High School will start in summer 2009 with completion in Fall 2011.

Information on bid participation can be found under the Bid Opportunities section of our website at http://www.ihcconstruction.com/bid_opportunities/index.html.
